Infra Review Completed

Code Review

Here's the peer review of the AWS Glue Job based on the provided checklist:

1. Code Structure & Readability

Is the code modular and function-based? Common functions being used for any repetitive code?
- Status: NEEDS IMPROVEMENT
- Explanation: The code is not modular and consists of a single main function.
- Recommendation: Break down the code into smaller, reusable functions for better modularity.

Are variable, methods, classes and function names meaningful?
- Status: PASS
- Explanation: The variable and function names (main, S3_BUCKET) are meaningful.
- Recommendation: Continue using descriptive names for variables and functions.

Are all method and function names in lowercase with words separated by underscore?
- Status: PASS
- Explanation: The main() function follows the correct naming convention.
- Recommendation: Maintain this convention for any new functions added.
